

SARA KIANI NEJAD

IT Student | Software Developer & UI/UX Designer

PROFILE

Motivated IT student with a solid foundation in software development and problem-solving, currently seeking an internship to gain hands-on industry experience. Experienced in both front-end and back-end development, database systems, and UI/UX design, with a focus on building user-centered and scalable websites and applications. Known for being proactive, detail-oriented, and a quick learner in collaborative environments. Eager to contribute to real-world projects and further develop as a software engineer.

TECHNICAL SKILLS

- **Web:** HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS
- **Backend & Databases:** NestJS, PHP, MySQL
- **Programming Languages:** Java, C#, C++, Arduino
- **Tools:** CI/CD (GitHub Actions), Docker, Jira, Scrum
- **Game Development:** Unity, Unreal Engine
- **Design & UI/UX:** Figma, Blender, UI/UX Design & Prototyping

SOFT SKILLS

- Analytical Thinking, Attention to Detail
- Problem-Solving, Teamwork, Time Management,
- Communication, Proactivity
- Responsibility & Ownership
- Adaptability & Fast Learning

LANGUAGES

- English - Fluent
- Dutch - Basic (A1)
- Persian - Native

HOBBIES AND INTERESTS

Reading books | Travelling | Cycling

EDUCATION

BSc Information Technology

2024 – 2028

NHL Stenden University of Applied Sciences, The Netherlands

High School Diploma, Mathematics and Physics

Graduated: 2022

Shahed High School, Ahvaz, Iran

EXPERIENCE

Cashier | September 2025 – April 2026

Aldi, Netherlands

- Operated checkout efficiently in a fast-paced environment, handling cash and card payments responsibly
- Provided friendly customer service and communicated with customers in Dutch and English on a daily basis
- Maintained an organized workspace and stayed calm and focused during busy periods

PROJECTS

SeGAR – Unity VR Game for Dementia Therapy | April 2025 – May 2025

Tools: Unity, C#, Meta Quest 2 | [GitHub](#)

Created a VR game with memory-based gardening tasks to support cognitive engagement for elderly users.

Silent Storytellers – VR Awareness Experience | April 2025 – June 2025

Tools: Unreal Engine, PHP, HTML/CSS, Blender, Figma | [Deafinitystories](#)

Designed a web and VR platform to share real stories from the deaf community and simulate communication barriers.

SSH Capture the Flag – Multiplayer Web Platform | September 2025 – January 2026

Tools: JavaScript, TypeScript, SSHamble, Figma, GitHub Actions | [GitHub](#)

Designed and developed a multiplayer Capture the Flag game over SSH using client-server architecture, enabling real-time multi-user interaction; additionally served as Product Owner and created the full website wireframe, translating requirements into structured UI/UX designs.

StreamFlix – Full-Stack Streaming Platform | November 2025 – January 2026

Tools: React, TypeScript, NestJS, MySQL, Docker | [GitHub](#)

Developed a full-stack streaming platform using React and NestJS, implementing user authentication, RESTful APIs, and a MySQL database, all containerized with Docker Compose.

Smart Time Registration System | January 2026 – April 2026

Tools: React, JavaScript, NestJS, TypeORM, REST API, MySQL, Git, Docker | [GitHub](#)

Developed a full-stack web application using React and NestJS for tracking employee work hours within projects, acting as Scrum Master and designing the system wireframes. Implemented authentication, RESTful APIs with TypeORM, and dynamic UI components for project management and dashboards. Used Docker for containerization and ensured efficient API communication and client-side validation.
